## MB-450 Series II Signature Monoblocks

Music connoisseurs have long admired the MB-450 for outstanding performance at a fair value. Now, VTL has significantly revised these venerable monoblocks, using many of the technological innovations derived from the flagship Siegfried Reference Amplifier. The extensive updates to each model include a revised power supply, SmartTube technology with automatic bias adjustment and fault sensing, and improved electronic components. The result is a significant advance in sonic performance, with much improved bass punch and dynamics. A sleek new chassis impressively incorporates a smoked glass window, giving users a glimpse of the glowing tubes within. These monoblocks are ideally suited for those seeking a thoroughly modern high-power amplifier that competes in sonics, looks and usability with the very best.

### Feature List:

1. VTL proprietary Signature output transformer
2. Software microprocessor controlled
  - Tetrode/Triode Switchable
  - Auto Bias, Fault Sensing
  - Current in-rush limiting
  - Standby Mute function
3. 450 watts per channel in tetrode;  
200 watts per channel in triode
4. 8 6550C or KT-88 tubes per monoblock
5. Regulated screen supply and separate fusing
6. Discrete regulated input and driver supply
7. Redesigned fully balanced input and driver stages
8. INFINI caps
9. Extruded aluminum front panel with luxurious, modern look – black and silver options available
10. Front panel window of thick smoked glass reveals the glow of multiple output tubes
11. Rack mountable
12. Rigid construction and improved heat ventilation

**US Retail \$13,500 per pair**
